Innovative lighting solutions for modern spaces. Explore our range of premium LED products.

THE COMPANY

Indi Lites is an Indian LED lighting solutions brand under Khateeb Trading LLP, established in 2014. Headquartered in Mumbai, we design and manufacture over 200 high-performance lighting products for residential, commercial, retail, hospitality, industrial, architectural, and outdoor applications.

From utility lighting and premium indoor fixtures to custom profile systems and specialized outdoor solutions, our products combine energy efficiency, durability, and design excellence.

We specialize in customized LED lighting tailored to the unique needs of architects, interior designers, consultants, and businesses. Every solution we deliver reflects our commitment to quality, reliability, and long-term value.

Trusted by renowned brands, retail chains, commercial establishments, government organizations, and infrastructure projects across India, Indi Lites stands for India-made quality, innovation, and customer-centricity.

OUR PROJECTS

PRESTIGIOUS PROJECT FOR THE INDIAN DEFENCE FORCES

We had the privilege of completing a prestigious lighting project for a government guest house frequented by elite officers of the Indian defense forces and high-ranking officials, including ministers.

This significant project involved supplying a comprehensive range of advanced lighting including COB lights, downlights, custom-designed profile lights, and luxurious golden-colored donuts.

The use of LED lights for ceiling ensured that the lighting complemented the elegant and official environment, creating both functional and aesthetically pleasing spaces.

Our Team

Our expert team carefully selected modern ceiling lights and energy-efficient LED lights to create a warm yet sophisticated atmosphere. The combination of decorative ceiling lights, recessed ceiling lights, and custom-designed lighting fixtures elevated the overall look of the guest house and two banquet halls. The seamless installation of LED lights for ceiling ensured uniform brightness and energy savings, reinforcing our commitment to delivering high-performance lighting solutions.

We were honoured to receive glowing feedback in the form of a testimonial upon project completion. We are proud to have been a part of such a remarkable endeavor, underscoring our commitment to delivering excellence in every project we undertake.

CASE STUDY

ENTERTAINMENT & AMUSEMENT LIGHTING

Project: Bowling Alley & Gaming Zone

Location: Premium Commercial Entertainment Hub

System Implemented: Linear Chroma-Tracks & Programmable Architectural LED Systems

Design Overview

To complement high-energy gaming atmosphere, the lighting architecture was designed to bridge the gap between immersive entertainment and modern aesthetics. The main bowling alley features geometric, angular overhead linear tracks that cut through the dark industrial ceiling, creating a dramatic forced-perspective effect down the lanes.

The vibrant neon and electric blue hues reflect effortlessly off the polished lanes and glass surfaces, ensuring the venue feels premium, cinematic, and deeply engaging for visitors.

Key System Features

- ⦿ **Dynamic Chroma Linear Lines:** Custom angular overhead tracking that provides crisp, continuous geometric lighting shapes without standard pixelation or dark spots.
- ⦿ **Acoustic & Structural Integration:** Fixtures are precisely suspended to avoid interfering with overhead scoring monitors, masking panels, and lane projection systems.
- ⦿ **Atmospheric Contrast:** High-output, low-glare illumination that maintains a dark, premium ambient environment while perfectly illuminating functional target areas like bowling pins and ball returns.
- ⦿ **Logo & Wall Wash Syncing:** Background architectural lighting is color-calibrated to complement the illuminated corporate brand signage perfectly.
